INTERESTING LECTURE BY DR. MACDONALD ON INSANITY ILLUSTRATED BY LIVING EXAM-

Dr A. E Macdonald, mcGloal superintendent of the City Asylum, on Ward's Island, delivered the second of a series of clinical lectures yesterday afternoon upon the diagnosis of insanily before an audience of bout 150 medical students and practitioners. The Doctor's lecture had the accompaniment of living illustrations, some fifteen patients being on hand belonging to the type of melancholia. The Irst lecture, delivered a week ago, was on the subject if "Mania;" the one yesterday was on "Melancholia. Dr. Macdonald said that melancholia was the opposite orm of disease from mania, and the tendency of its rictims was to depression, delusion and deception. the bodily health might be good where the case s not severe. In acute cases there is wanness paleness of the flesh. The tendency these cases of metanoholia is to suicide. and in his investigations he found that the hereditary laint was discoverable in eighty per cent of the whole number of patients in the Asylum. The patients belong to a poor class of people, laborers and mechanabout principally through the poverty of their living, indulgence in alcoholic stimulants various forms of grief resulting from of work and the pressure of hard Three out of five recent cases in this form of insanity are cured, and the doctor observed that in criminals, they were newsdays treated medically and along with all the adjuncts of open air exercise, clean

slong with all the adjuncts of open air exercise, clean corridors and dormitories, ventilated to perfection; good food and gentlest possible treatment there was added medicinal treatment, having in view the restoration of the physical and menual parts of the patient.

The first man brought in, clau in brown denim, was a recent case, only two weeks in the asyium, where there are now 975 patients. He was thirty-two years old and a plasterer by trade. He said that he thought detectives were following him around the city and taking hold of his collar in front and saying, "You're a son of a gun." He thought, too, that his wise was mixed up in a conspiracy against him. "That," remarked the doctor, "he an inevitable thought with patients of this class. They are sure to bring in a relative of one kind or the other as conspiring against thief happiness." The second man looked about thirty-two years old and was formerly a member of Gilmore's band. In his andress to the students he said he had a gift from God finat would enable him to learn as much in three months as any ether rooster could learn in three years.

Gilmore's band. In his andress to the students he said he had a git from God that would enable him to learn as much in three months as any ether rooster could learn in three years.

The next case exhibited was that of a man who had been in the asylum for about six years and was fortyive years old. He was in a chronic condition of melanonolis and airaid to be left alone. He said he thought witches came into his room at night and kept him awake. He thought also that he had been killed, and on being asked by Dr. Macdonaid how it was he was still alive, he answered that he had been killed only half over and enough vitality was left after the Gatling guns had ploughed through his corporosity to keep him above the gimpses of the moon. He declared velomentity that the American war was against him and instituted to crush out his individuality. He considered at one time that his head was full of tar and grease put there by the Freemasons, but of late he had been getting rid of it by waiting up and down and shaking his head so that it lei out.

AN INTELLECTIAL LUNATIC.

The last subject was a school teacher, about forty-free years old, with a bald head, a long brown beard and a great gift of the gab. His delusion was that things were given him, his food with intent to poisou him. He said the seeds of cancer were put in the soap he used for washing him bread, and, his gums being soit and trader, and then they gave him medicine in his food with intent oposiou him. He said the seeds of cancer were put in the soap he used for washing him bread, and, his gums being soit and trader, and then they gave him medicine in his food with intent oposiou him, and a German child was conceived in his stomach in consequence thereof; and then they gave him medicine in his food to procure abortion. For stucents barst out laughting here, and he turned on them sharply and said:—"Gentlemen, I tell nothing but the truth; look at my mith legs," exhibiting his legs with much display, He was the meat intellectual of all the lunatics exhibited. He

THE GUNBOAT CLABA.

The gunboat Clars, recently constructed by the off Manufacturing Company for the Spanish government, sailed yesterday for Havana, where she to be delivered to her owners. The work on the Ciara was commenced on February 1, 1878, and was pushed along as rapidly as possible. She was launched pushed along as rapidly as possible. She was launched on May 20. The dimensions of the beat are as follows:—Length, 135 feet; heam, 19 feet, and draft 9 feet. She is schooner rigged and has a composite bull. She is fitted with a compound condensing engine 12x21x24, and the steam is supplied by the largest coil boiler ever made. Under the terms of the contract she was required to steam sixteen knots, and a trial trup was made on Wednesday last under the supervision of Mr. J. N. Montogo, the naval attache of tory, as the Clara made forty eight miles in two bours and fitty-seven minutes. The Clara sailed for Havana in charge of John B. Herreshoff and C. F. Herreshoff, Jr., with Captain John Collins as navigator. This wift be the first test of the coll boller in a sea voyage.

THE FRANKLIN EXPEDITION.

The departure of the schooner Eothen, which was to have left this port yeaterday in search of the rec-erds and relies of Sir John Frankilo, has been postponed until to-morrow or Tuesday. Captain Thomas F. Barry, who will command the vessol and have general charge of the expedition, said that everything was in readmess for the start, and that the cause of the delay was the illness of Licutenant Schwatka, of the Third United States cavuity, who will have charge of the party to proceed inland in search of the reitor.

TAXING THE CARTMEN.

The announcement is made by Mayor's Marshal Kelly that he will to-morrow commence to rigidly enforce the cartmen's ordinance recently passed by the Board of Aldermen. This ordinance applies to every business conveyance in the city, and it is expected that an income of over \$50,000 will be realized from licenses. The main section provides that "every cart, truck, wagon, dray or other vehicle drawn by one or more horses or other animals which thall be kept, used, driven or employed for the transportation or conveyance of goods, waree, merchandise or other articles from place to place within the city of New York shall be deemed a public cart within the enaming of this chapter, and every person who shall set up or so keep, use, drive or employ any such public cart without first obtaining a license therefor from the Mayor of gain city shall be deemed guilty of a violation of this chapter." business conveyance in the city, and it is expected

SOCIALISTS IN COUNCIL.

THE ATTEMPTED ASSASSINATION OF THE EX PEROB WILLIAM CONDEMNED. ting of the socialist party was held last

evening at Germania Assembly Rooms, in the Bowery, at which the position of the party in regard to the stempted assassination of the Emperor of Germany was fully discusse by at least fitteen hundred men, and scattered among them were some dozen women, chiefly Bohemia cigar makers, all of whom were most earnest in the cause of socialism and labor reform. Mr. F. Scarca presided. The meeting opened with the reading of the following preamble and resolutions:-

That events recently transpiring in Germany have produced the greatest excitement, which thence abread itself over the whole civilized world, such as.

An alleged attempt to assuminate the Emperor of Germany; the destruction of the German fron-clad Gresser Kartinett.

An alleged attempt to assissinate the Emperor of Germany; the destruction of the German iron-clad Grossot Kurturs;

The presentation by the German government of representative measures against socialism known as the socialist bill;

The deleast of same by the representatives of the people in the German hampers, the alleged result of a socialistic conspirate.

A second and more effective attempt to assassinate the German hampers, the alleged result of a socialistic conspirate.

Considering that these events have been used by the reactionary classes and their service press for the demunciation of the socialistic labor movement to bring assignton upon and otherwise injure it.

Considering that these events have been used by the reactionary classes and their service press has shown itself in numerous instances devois of all feeling, devoid of justice and humanity, in condemning and denorcing men and the aspirations of man, without a knowledge of the facts in the case, without a sufficient proof of their assertions to warrant the expression of even an opinion, and that it demanded repressive measures against such men and their aspirations.

Considering that socialism is based on science, truth, justice, humanuty and morality, and is, therefore, most emphatically opposed to the deedfling of blood in general and of murder and assassination to account the minimum of the service of the condition of the service of the condition of assassination, and call to account the minimum of the service of the condition of the service of the propersion of the nations alwars produce individually exponent of the condition of unashind, of which fact history furnishes incumerable examples.

Resolved, That we emphatically condemn the tendency of the greater per of the capitalistic pross, and improving the condition of mankind, of which fact history furnishes incumerable examples.

Resolved, That we appeal to all sensible men desiring the welface of mankind, of which fact history furnishes incumerable examples.

Resolved, That we appeal t

The first speaker in response to these resolutions was Mr. H. Drury, a name well known in the social labor movement. He suid :- I wish to speak in regard to the resolution of conceiving assussination-I, who a red-banded murderer-and I wish to tell those who oppose us that the social labor party is a party of progress and a party of peace. We are opposed to assassination of individuals by an individual, for we reserve the right to society to take the life of any individual. Let us go back to 1572, when the celebration of the conclusion of the France-Program war took place in Tompkins square, and when the praises of the Kaiser were so highly sung. There was no opposition then; but when, a few years later, we, the socialistic party, met there to express our ideas of peace and the rights of workingmen, we were met by the revolvers and cloud of the police. At the time the meeting was held to celebrate the Frussian victory over France a certain number of of secialists met in the Tenth Ward Hotelto debounce the condition of war which robbed the people of France of five milliards of francs. The same men who cried for peace then are the same to-day, and they are stronger than ever. We represent an idea which neither the bayonets of Napoleon, the rifles of the Kaiser nor the imperiat governments of all Europe can repress. He said that day in the Tenth Ward Hotel that when the indemnity collected by Prussia from the labor of France of the more of the would be spent she would be poorer than before. She is poorer now. A bastard aristocracy is worse off than before, and we knew that would be the case. Now, as to the question of Dr. Nobeling, if the great statesmen cannot under stand it we will explain it to them. There is such a thing as mental force and a paramount idea, and here comes the secret of the attempted assassination by Noteling. The money raised by the intermity was spent like the money of gamblers; and instead of ideas of industry ideas of speculation were promulgated. The government fell into disrepule among the people, and the statesman Bismarck to keep centrel had to go back to the villanous machinations of the second French Empire and get up two or three bogus assessinations. So it was thought by some one. "Stop your bogus, or we may give you somethin those who oppose us that the social labor party is a party of progress and a party of peace. We are

UPROAR IN A THEATRE.

The Theatre Comique, Williamsburg, was the scene of a remarkable performance last night in consequence of the non-appearance of Mr. O'Brien, manager of the Elwood Female Minstrel Troupe, and its consequent disbandment. Mr. O'Brien had leased the theatre for one week from last Monday, going there from Paterson, where the troupe had performed the week previous. None of the troupe or orchestra had been paid, it is alleged, and they sued out a writ of attachment on the receipts of last evening's performance beleeve Judge Elliott. The Judge placed Constable Lepine in charge of the box office, and at eight o'clock the nouse was pretty well filled. The price of admission to the gallery was fifteen cents, to the circle twenty-five cents and to the orchestra seats thirty-five cents, and, as the time were on and no performance began, the audience became impatient, and when it became rumored that the orchestra refused to play until they were paid they became uproartious. One man at last suggested a raid on the box office, and a frantic rush took place for that centre of attraction. The frightened doorkeeper fled and the howling mob from the three sections of the house flifed up the lobbies and halls demanding the return of their money. The delay and frantic efforts to reach the window led to several fistic encounters that made matters worse, and a general row seemed imminent as the police were learned in the crowd and could do nothing toward quieting the disturbance. At this juncture a man named Peter Brennan suggested a compromise. The sudence were coaxed back into their reats, on the plea that no money could be paid amid such conjuston. After a short consultation the actors, male and lemale, consented to play, as did the musicians, if the receipts of the evening would be divided equally between them at the close of the performance. A lew minutes after ten o'c-ock the curtain was run up, and for nearly two-hours the programme was carried through amid the shouts, yells and catcalls of the audience. At the close of the show at midnight the money was divided and all the performers, vowing vengennee on the head of O'Brico, wended their way to the letery, followed by the peers of the crowl which filled the square in front of the theatre. of attachment on the receipts of last evening's per-formance belove Judge Elliott. The Judge placed

EGIPTIAN HALL RAIDED.

Captain Murphy, of the Twenty-first precinct, with a pintoon of policemen, last night made a raid on Egyptian Hall in East Thirty-fourth street and arrested the proprietor of the place and twenty-four performers. The descent was made on a warrant issued by Police Justice Duffy. It is claimed in the warrant that certain leatures of the performance were immoral. The prisoners were locked up for the night, and will be arranged at court to-day.

TOO MUCH LIQUOR.

A man giving the name of Frank Sackson was with breaking into the liquor store of James Byrnes, No. 65 Mott street, by forcing open an iron shutter. The prisoner was found by Officer Gliman in the hall-way of the premises under the influence of liquor, which it is supposed he orank in the liquor store after breaking in. Judge Wandell held him in \$1,500 bail for trial.
